PROFESSIONAL SUMMARY

IT support and operations professional working across hardware and software troubleshooting, inventory systems and workflow automation. Digitized an inventory database that cut record retrieval time by **40%**, resolved **90%** of user-reported issues on first contact, and cut stock loss by **18%** with reconciliation procedures. Currently building agentic AI tooling — LLM planning, n8n orchestration, and guardrails with repeatable tests — and working toward Google Cybersecurity and CompTIA Security+ certification.

CORE SKILLS

IT support: Windows troubleshooting · hardware & software diagnostics · system optimization · onsite and remote support · documentation

Networking & security: TCP/IP and network configuration · monitoring · cybersecurity fundamentals · SIEM (studying) · secure data handling and confidentiality

Data & automation: MySQL (basic) · GitHub · n8n workflow automation · LLM-based agents with guardrails and tests · HTML/CSS/JS

Operations: Inventory and stock control · procurement support · logistics coordination · stock audits · data entry accuracy · team leadership

Tools: Windows OS · Linux (basic) · MS Office · Google Workspace · live streaming systems

PROFESSIONAL EXPERIENCE

Office Assistant / IT Support — RCCG Solution Assembly, Oyo Province
June 2025 – Present
Ibadan, Nigeria

- Provide live technical support for streaming and video recording, keeping services uninterrupted through outages, equipment faults and last-minute changes.
- Maintain the digital and hardcopy document system, improving access and retrieval across the provincial office.
- Track office supplies inventory and tighten procurement cycles to avoid stockouts.
- Support leadership with administrative and IT tasks under strict confidentiality.

Store Clerk / Technical Operations Assistant — Rom Oil (PEOPL)
July 2024 – March 2025
Ibadan, Nigeria

- Digitized the inventory database, **cutting record retrieval time by 40%**.
- Improved spare-parts availability by 30%, reducing operational downtime.
- Supported procurement processes, reducing urgent-order delays by 25%.
- Ran periodic stock audits, reducing discrepancies by 15%.
- Verified shipment documentation with 100% accuracy across all batches handled.

Warehouse Manager — PADVAP Publications Ltd.
November 2023 – June 2024
Ibadan, Nigeria

- Cut **stock loss by 18%** by implementing stock reconciliation procedures.
- Improved warehouse efficiency by 35% through workflow optimization.
- Reduced order fulfillment time by 20% via storage and layout reorganization.
- Supervised 10+ staff, improving coordination and daily throughput.
- Enforced safety protocols, decreasing workplace incidents by 25%.

Junior Developer / IT Support Assistant — Pitason & Smart Pro
March 2022 – September 2022
Ibadan, Nigeria

- **Resolved 90% of user-reported technical issues on first contact**.
- Built lightweight web applications that automated recurring client operations.
- Improved system stability by 20% by collaborating on debugging and root-cause fixes.
- Tested and documented software bugs and their fixes for the support team.

Field Engineer (IT Support & Systems Optimization) — Clearwox Systems
April 2021 – September 2021
Ibadan, Nigeria

- Delivered onsite and remote IT support with a 95% resolution rate.
- Reduced downtime by 30% by supporting system upgrades and optimizations.
- Improved operational efficiency by 20% by implementing tailored IT solutions.
- Maintained hardware, networks and application reliability across client sites.

SELECTED PROJECTS

Operations agent with guardrails — Public demo · deterministic rules engine · 14-scenario test suite

- Triage agent that classifies an incident, selects from approved playbooks only, and escalates anything irreversible, over-budget or low-confidence.
- Guardrail logic is covered by a repeatable test suite with an independently written answer key; the CLI exits non-zero if a decision diverges.

Research & reporting agent — Design write-up and blueprint

- Source discovery, credibility filtering and verification before synthesis, with every claim carrying its citation and a human approving before publication.

Stock & replenishment agent — In progress — builds on the inventory work above

- Turns demand signals into replenishment recommendations and flags the assumptions a human should check before ordering.

EDUCATION

B.Sc. Computer Science — ESPAM Formation University, Porto-Novo, Benin Republic · 2020 – 2023
Graduated Summa Cum Laude — 4.0 GPA

Secondary & primary education — Calvary International College; Calvary Heritage Group of Schools, Ibadan

CERTIFICATIONS

Google Cybersecurity Professional Certificate — In progress
Google IT Support Professional Certificate — In progress
Cisco CCNA — Introduction to Networks — Ongoing
CompTIA Security+ — Planned
